Antoine Bousquet

3EA Engineering Student (Electronics, Electrical Energy & Control)

Toulouse, France antoine.bousquet2@etu.toulouse-inp.fr LinkedIn

PROFESSIONAL SUMMARY

Driven and analytical engineering student in the first year at ENSEEIHT (Toulouse INP). Strong analytical background acquired through an intensive MPI preparatory class. Keen to join high-stakes, technology-driven industries, with a primary focus on embedded systems, power electronics, and aerospace engineering.

EDUCATION

ENSEEIHT (Toulouse INP) — Toulouse **2026 – Present**

Master of Engineering - 3EA Department (Electronics, Electrical Energy & Control)

CPGE (Preparatory Class) — MPI Track **Rouen**

Mathematics, Physics, and Computer Science (Intensive preparation for competitive engineering exams).

ACADEMIC & TECHNICAL PROJECTS

TIPE — Study of Deterministic Chaos: Hydraulic Lorenz Wheel **CPGE MPI**

- **Situation & Task:** Design and construction of an experimental hydraulic Lorenz wheel testbench to model non-linear systems.
- **Action:** Development of a physical continuous water-fed bucket setup, rotational speed data acquisition, and Python numerical simulations.
- **Result:** Experimental demonstration of sensitivity to initial conditions (Lorenz attractor) and official validation (DOT/SCEI).

SKILLS & TOOLS

Fields: Electronics, energy conversion, automatic control, embedded systems.

Programming: C language, OCaml, Python, algorithms.

Languages: French (Native), English (Advanced - 14/20 Mines/Centrale), Spanish (Beginner).

Soft Skills: Analytical rigor, leadership, teamwork, resilience.

EXTRACURRICULAR EXPERIENCE & HOBBIES

Active Member — CAN7 Association (ENSEEIHT)

Involvement in the 2nd largest student event association in France: logistics, team management, and secure coordination of major gatherings.

Activities & Passions

Weightlifting: 5 to 6 sessions per week (rigor and discipline) | **Running** | **DJing / Mixing** (creativity and sense of rhythm).
